Email: abcp@abcp.org

CLINICAL ACTIVITY EXTENSION REPORT COVER SHEET

Send Clinical Activity Extension Report Cover Sheet, Hospital Address Form for Extension Cases, Authorization for Release of Information Form, Extension Case Record Clinical Activity Report along with \$125.00 filing fee and \$75.00 extension fee (total of \$200.00) by certified mail, return receipt requested. Deadline for mailing of report is December 31 of the reporting year.

Accredited Affiliate
 Perfusion Program/
 School:

PUT NUMBER CORRESPONDING TO CASE CATEGORY IN COLUMN LABELED CC.

Primary Clinical Perfusion Activities (PCPA)

- 1P Cardiopulmonary Bypass (CPB), Primary
- 2P Instructor CPB, Primary
- 3P Extra-Corporeal Membrane Oxygenation (ECMO), Primary
- 4P Isolated Limb/Organ Perfusion, Primary
- 5P Venous-venous of Left Heart Bypass, Primary
- 6P Ventricular Assist Device (VAD), Primary

Secondary Clinical Perfusion Activities (SCPA)*

- 1S CPB, First Assistant, Secondary
- 2S Ex Vivo, Secondary
- 3S Intraperitoneal Hyperthermic Chemoperfusion or Intrapleural Hyperthermic Chemoperfusion (HIPEC), Secondary
- 4S Cardiopulmonary Bypass (CPB) Standby Procedures, Secondary
- 5S High Fidelity Perfusion Simulation (HFPS), Secondary

*Combined Maximum of 15

American Board of Cardiovascular Perfusion

Table A - Primary Clinical Perfusion Activities (PCPA)

Retain for your information; do not return.

| Primary Clinical Perfusion Activities (PCPA) | Clinical Definition | Core Elements |
|--|---|--|
| 1P Cardiopulmonary Bypass (CPB), Primary | A Certified Clinical Perfusionist (CCP) who is the primary operator of the heart-lung machine, used during cardiac surgery and other surgeries that require extracorporeal circulation, used to manage the patient's physiological status. | Blood pump, reservoir, heat exchanger, oxygenator, extracorporeal circuit used accordingly with hemodynamic/lab value monitoring |
| 2P Instructor CPB Bypass, Primary | A Certified Clinical Perfusionist (CCP) who serves as a clinical instructor to a student enrolled in an accredited perfusion program during primary clinical perfusion activities that require extracorporeal circulation, used to manage the patient's physiological status. | Blood pump, reservoir, heat exchanger, oxygenator, extracorporeal circuit used accordingly with hemodynamic/ lab value monitoring. Primary clinical perfusion activities (PCPA) performed as clinical instructor in an accredited program are considered a primary perfusion activity and will receive full case credit. During clinical instruction in which the student is operating extracorporeal circulation equipment, there must be direct one-to-one supervision by the clinical instructor. Students may also receive credit toward certification eligibility for the same case. |
| 3P Extra-Corporeal Membrane Oxygenation (ECMO), Primary | A Certified Clinical Perfusionist (CCP) who is the primary operator of Extra-Corporeal Membrane Oxygenation (ECMO) circuit that provides life support for respiratory and/or cardiac failure. | Extracorporeal circuit, oxygenator, heat exchanger used accordingly with hemodynamic/lab value monitoring. For each ECMO case, one case credit per 24 hours will be awarded for initiating and bedside managing ECMO (4-hour minimum) or bedside managing (6-hour minimum). No simultaneous credit will be awarded for managing multiple ECMO patients in this time period. |
| 4P Isolated Limb/Organ Perfusion, Primary | A Certified Clinical Perfusionist (CCP), who is the primary operator of an extracorporeal device used to deliver anticancer drugs directly to an arm, leg, or organ that manages the patient's physiological status. | Reservoir, blood pump, heat exchanger, oxygenator, extracorporeal circuit used accordingly with hemodynamic, temperature, and lab value monitoring. |
| 5P Veno-Venous or Left Heart Bypass, Primary | A Certified Clinical Perfusionist (CCP) who is the primary operator of an extracorporeal device, used to perfuse specific vascular regions within the circulatory system. | Blood pump, extracorporeal circuit used accordingly with hemodynamic/lab value monitoring. |
| 6P Ventricular Assist Device (VAD), Primary | A Certified Clinical Perfusionist (CCP) who is the primary operator of the Ventricular Assist Device (VAD) that provides cardiac support for the failing heart. | For each VAD case, one case credit per 24 hours will be awarded for initiating and managing VAD or bedside managing (6-hour minimum). No simultaneous credit will be awarded for managing multiple VAD patients in this time period. |

American Board of Cardiovascular Perfusion

Table B - Secondary Clinical Perfusion Activities (SCPA)

Retain for your information; do not return.

| Secondary Clinical Perfusion Activities (SCPA) | Clinical Definition | Core Elements |
|--|---|---|
| 1S CPB, First Assistant, Secondary | The “CPB First Assistant” is the Certified Clinical Perfusionist (CCP) whom the hospital/institution recognizes as the assistant to the primary perfusionist during the conduction of perfusion. | The “CPB First Assistant” must be documented within the operating suite and actively assisting during the operative case. Multiple First Assistant credits will not be allowed during concurrent operative procedures. |
| 2S Ex Vivo, Secondary | A Certified Clinical Perfusionist (CCP) who is the primary operator of an extracorporeal device, used to perfuse isolated and separated human organs from the body, for potential transplant opportunities. | A device with Ex Vivo blood flow regulation & extracorporeal oxygenation used accordingly with hemodynamic/lab value monitoring. For each Ex Vivo case, one secondary case credit per 24 hours will be awarded for initiating and/or managing. No simultaneous credit will be awarded for managing multiple organs in this time period. |
| 3S Intraperitoneal Hyperthermic Chemoperfusion or Intrapleural Hyperthermic Chemoperfusion (HIPEC), Secondary | Certified Clinical Perfusionist (CCP) who is the primary operator of an intraperitoneal or intrapleural device. | A device with pump flow, circulation, temperature, monitoring, and regulation of chemotherapeutic fluids within abdominal or thoracic cavity for periods exceeding 30 minutes. Syringe infusion devices will not be counted as a SCPA. |
| 4S Cardiopulmonary Bypass (CPB) Standby Procedures, Secondary | A Certified Clinical Perfusionist (CCP) who is the primary standby operator of the heart-lung machine, used during cardiac surgery and other surgeries that require extracorporeal circulation, used to manage the patient's physiological status. | Any procedure that may require immediate and onsite extracorporeal circulatory support. Standby procedures must be documented, requested by the attending physician, and verifiable in an audit. |
| 5S High Fidelity Perfusion Simulation (HFPS), Secondary | A Certified Clinical Perfusionist (CCP) who is the primary operator of the heart-lung machine or ECMO circuit, used to manage physical and physiological variables during simulated perfusion scenarios taking place at an ABCP-recognized HFPS center. | HFPS is the use of simulation modalities or mechanisms to create a realistic patient model or perfusion situation. HFPS must be an interactive process facilitated by a CCP using standardized medical simulation devices that integrate realistic perfusion events experienced during CPB procedures in a realistic surgical setting using a conventional heart-lung machine or ECMO circuit. Each HFPS or series of HFPS must have an education/briefing, simulation, and debriefing. The simulation/simulation series length must be no less than 50 minutes of active simulation activity. One case credit is awarded for each HFPS activity that meets or exceeds these guidelines. Each HFPS must include and retain a participant evaluation form. |
